ABSTRACT

Every paper should include an abstract with 100-300 words. At the end of the abstract, skip a line and then type "***Keywords***:" (bold, italic, and followed by a colon) followed by 3 to 8 words that describe the focus and contribution of the paper.

Keywords: keyword1, keyword2, keyword3, keyword4

1. TITLE OF THE PAPER

The title of the paper should be written in bold in 14 point font, centered on the top of the paper. The first letter of every word in the title should be capitalized. The authors' names and their affiliations, following the title, must be 11 point font.

2. HEADINGS

Headings are numbered and capitalized. All major headings are centered in bold in 10 fonts. Do not put a period after the text of the heading. Leave one line above a major heading, and one line clear below before the start of the next paragraph or second-level heading.

2.1 Subheadings (Second-Level Heading)

Subheadings are flush left, in 10 point type and bold and upper and lower case as shown. There should be one line space both before and after this level of heading, as shown in the subheading for this paragraph.

3. BODY OF THE PAPER

The Copyright Reference code must be placed on the bottom, left-hand side of the first page of the paper:
ICMSDM-TW.
The whole paper should be written in "Times New Roman" font. Except the title of the paper that is in 14-font size and the authors' names and their affiliations in 11-font size, the whole paper should be written in 10 fonts. Every graph should be justified. The line spacing should be single line. And please leave one line space between two paragraphs. Every paper should be less than or equal to 10 pages.

Except the title, authors' name and affiliation, and abstract, the whole paper should be two-columned. The width of each column should be 8cm; the space between the two columns should be 1cm.

Please set the paper size as A4 (29.7cm*21cm). Leave 2.5cm margins at both the top and the bottom of the page, 2cm on both right and left sides. Please write your paper using MS-Word. The Word of microsoft's office 2010 and 2013 is strongly preferred. If you write the paper by using other versions' Word, please give clear indication of what version of Word you use when you submit the paper by email.

3. FIGURES AND TABLES

Figures and tables should be placed as close as possible to where they are cited. Captions should be Times New Roman 10-point. Figures and Tables should be numbered separately and consecutively. Figure's captions should be flush center below the figures, and Table captions should be in center above the table body. Initially capitalize only the first word of each caption. Table contents should be Times New Roman 9-point. If some figures or tables are so large that they are unreadable presented in left or right column, they should be set across both columns.

6. VARIABLES AND EQUATIONS

The variables listed in the paragraph should be aligned to fully display rather than 15-point space. All variables should be *italic* through the text.
All equations should be placed on separate lines and numbered consecutively, with the equation numbers placed within parentheses and aligned against the right margin as shown in equation (1).

$$\text{Min } C = \sum_{i=1}^{N} \sum_{t=1}^{T} (h_i y_{it} + s_i \delta_{it}) \qquad (1)$$

Be sure that the symbols in your equation have been defined before the equation appear or immediately following.

REFERENCES

[1] References should appear in a separate section at the end of the manuscript. References must be complete, accurate, and listed in the following style:

[2] Cachon, G.P., P.H. Zipkin, "Competitive and cooperative inventory policies in a two-stage supply chain", *Management Science*, Vol. 45, No. 7, pp936-953, 1999
